Explanatory Memorandum on the Annual Agricultural Statistical Returns A to E and instructions for compiling them. (Vide Government Proceedings No. 3473-80—R. 1100, dated 6th October 1897, No. 8108-15—R. 2657, dated 3rd March 1898, No. 7601-615—R. F. 46-97-98, dated 24th April 1899, and No. 4574-83—R. 1451, dated 22nd December 1899.)

———:o:———

These Statistical Tables are based upon returns compiled in the forms annexed talukvar for the whole District, in each District Office from data furnished by Amildars in their annual Jamabandi and other accounts.

2. They relate to the Revenue year ending on 30th June, and are submitted by each Deputy Commissioner on or before the 15th August following.

3. *Table A.*—Table A consists of four sections. Section 1 gives the total area of each taluk, the areas for which statistics are and those for which they are not available being distinguished.

4. *Table A, Section* 1.—Column 2 shows the gross area as ascertained by the Survey and Settlement Department. The figures were communicated to Deputy Commissioners in Government Proceedings of 28th January and 4th and 28th December 1896 and are subject to correction of course according as errors are discovered in resurveys of tracts.

Column 3 shows the survey areas of alienated tracts (such as jahgir, jodi, sarvamanyam and kayamgutta villages) for which the statistics required for the other sections of the table are not at present forthcoming in whole or in part. As surveys extend and the organization of village statistical establishments develops, the area in this column is reduced and that in Column 4 correspondingly increased.

Column 4 gives the remainder which is dealt with in the other sections of the Table A and includes the area of State Forests and Plantations.

5. *Table A, Section* 2.—The first part of this section deals with the classification of the area shown in the last column of Section 1 and gives the areas—

(*a*) withdrawn from cultivation by inclusion in forests or for some other reason (Columns 2 and 3);

(*b*) cultivable but not yet taken up (Column 4),

(*c*) land occupied but not under crop during the year (Column 5), and

(*d*) the net area under crops (Column 6), *i. e.*, after deduction of the area cropped more than once in the year.

The total of these 5 columns will of course equal the figure shown in Column 4 of A-1.

Column 2, "Forest" means any land classified or administered as forest under the Forest Rules, and includes District Forests and State Forests and Plantations separately mapped. Details of these should be invariably noted at foot of the return.

Column 3 includes land absolutely unfit for cultivation, land reserved as pasture (gomal lands and kavals of sorts), public topes and Government plantations, and also all lands covered by buildings, roads, water, &c., or otherwise devoted to uses other than agriculture. When with due sanction any of these areas are made available for cultivation, they should of course be transferred from this column to Columns 5 and 6. The extent of "Pot Kharab" forming part of survey numbers should be included under this column, the same being excluded from Columns 4, 5 and 6.

Column 4 shows the area of assessed unoccupied land.

Columns 5 and 6 show the areas of assessed occupied land not cultivated ("Kabulibanjar") and cultivated, as will appear in the abstract at foot of the Pahani Account (Village Account Form No. 7). Minor Inams in Government villages are included herein. In Mysore there is no system of fallows properly so called. Column 5 will therefore show land in occupation kept uncultivated from whatever cause.

Columns 8 to 12 show only the actual area of irrigated land, areas (if any) cropped more than once being reckoned but once.

Columns 14 to 17 should contain the actual area of irrigated crops, areas cropped more than once being counted as separate areas for each crop.

6. *Table A, Section* 3.—The 3rd Section of Table A which is based entirely on the Pahani Account (Village Account Form No. 7) shows the gross cultivated area under each crop irrespective of irrigation and double cropping, the area under the latter being included in the statement but subtracted in Column 42. The area dealt with is that shown in Column 6 of Section A—2. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate should be made by the shanbhog either on his own judgment or according to formulæ which may be hereafter prescribed by Government. The areas comprised in this return are the areas actually sown, whether the crop comes to maturity or not. The failure of the crop should effect not its area but its outturn. Where fields owing to the failure of the first sowings have been devoted to other crops, the area sown by the first sowings should be omitted.

The crops to be selected for inclusion in certain heads of this table are as follows :—

9. *Gram* (pulse) should include horse-gram, Bengal-gram, green and black grams.
10. *Other food grains including pulses.*—Same, haraka, navane, avare or ballar, tuvar or togari, tadagani or alasandi, &c.
12—15. *Others (Oil-seeds).*—Castor oil-seeds, inferior sessamum (hutchellu), ground-nut or nelakadalekayi, honge, ippe, &c.
17. *Condiments and spices.*—Pepper, cardamom, chillies, cummin seeds, coriander seeds ginger, mustards, turmeric, onions, garlic, mentya, &c.
22. *Others (Fibres).*—Pundi, Sanabu, &c.
27. *Others (Dyes).*—Rangumale, &c.
29. *Coffee* should be both malnad and maidan. The area covered by both mature and immature plants should be entered.
36. *Fodder crops.*—Kaki jola, &c.
37. *Orchards and garden produce.*—Mango, apple, figs, plantain, oranges, pomegranate, &c. The area of cocoanut, areca and betel-leaf gardens should also be included.
38. *Miscellaneous food crops.*—Vegetable gardens, potatoes, &c.
39. *Miscellaneous Non-food crops.*—Mulberry, &c.

7. *Table A, Section* 4.—This table deals with agricultural stock and is based upon the Khaneshumari Account (Village Account Form No. 11). It should include live stock in Municipalities for which the Khaneshumari Account should be written up by the shanbhog or a Municipal official. Oxen and buffaloes not old-enough for work or to produce young should be treated as " Young stock " in this return.

8. Stock in Municipalities is included since 1896-97.

9. Until 1898-99, Statistics of Live-Stock were collected every year by the shanbhog and patel of each village by inquiry and inspection, as a part of the year's Jamabandi routine. It was decided by the Government Order of the 24th April 1899 to take a quinquennial census and to repeat the figures of such census as statistics for the ensuing four years. There, it was also ordered that results of the first such census taken in June 1899 as nearly as possible simultaneously throughout the State should be adopted for the table of 1898-99. In the returns for that year however, these results were adopted in some districts, while in other districts the old system was pursued entirely in some and partially (*i. e.*, for some taluks only) in the rest. In the present compilation, for purposes of correct comparison the results for the special census of June 1899 are printed in antique type to distinguish them from the figures derived by the annual routine. Thus in the District Summaries at pages 12 and 13, the figures by the special Census are alone shown, while in the Talukvar Statements at pages 106-131, the routine statistics are shown wherever available in addition to the special Census figures.

10. *Table* * *B.*—This is a statement showing the average for the year of the prices current of certain articles, reports of which are now furnished twice a month.

* Not printed in the present collection.

Section 1 relates to Wholesale prices and Section 2 relates to Retail prices in all the districts of the State.

II. *Section* 1.—As to Section 1 (Wholesale prices)—

(*a*) It should cover the same articles and the prices should be collected fortnightly on the same days and by the same staff as for Section 2 (Retail prices).

(*b*) It need not quote a price for an article which is not a staple article of local trade.

(*c*) It need not quote a price for an article in which transactions have not actually taken place.

(*d*) The wholesale prices should be rendered in terms of Rs. for a unit of quantity. They should be those paid for quantities of ten maunds of food stuffs, seeds, grass and straw, for a score of sheep, and for a pair of bullocks, the maund being taken to be the equivalent of 82⅔ lbs.

12. *Section* 2.—As to Section 2 (Retail prices)—

(*a*) The remarks *a*, *b* and *c*, above made in regard to Section 1 are applicable to Section 2 also.

(*b*) The prices quoted should in one column be in terms of seers and chattaks available per rupee (one seer=16 chattaks=80tolas), and in another column the equivalent value of one seer in annas and pies.

13. *Table* C.—This table indicates the relation between area, population and land revenue or in other words the mean burden of the State assessment on the land assessed to it and on the community at large. The tenure to which this table (for the Mysore State) relates is entirely raiyatwari and the words "area fully assessed" in columns 3 and 4 mean area on which the "survey kamal or standard assessment" is leviable in full except that the area of minor inams will not be included in the figures to be entered in column 3 (*a*) inasmuch as a proportionate deduction cannot be made in the corresponding population.

Column 3 (*a*) represents the area of alienated villages, plus the area of unoccupied assessed waste land in sirkar villages (head 4 of Table A—2).

Column 3 (*b*) represents the area withdrawn from cultivation and should therefore exhibit the total of the areas shown against headings 2 and 3 of Table A—2.

Column 4 (*a*) exhibits the area of occupied lands (sirkar and minor inam) in Government villages and should therefore equal "Heading 5 + Heading 6" of table A—2 (current fallows + net area cropped during the year).

Column 4 (*b*) exhibits the area actually cultivated. The figure under heading 6 of Table A—2 will therefore be repeated here.

Column 5 should exhibit the total realisable Land Revenue including Miscellaneous Land Revenue of the whole district for the year after excluding arrears for past years. The figure to be entered here will therefore be that which represents the fixed demand under these heads plus Miscellaneous Land Revenue and minus remissions under defined rules, and minus also irrigation cess merged in the assessment as shown in the list appended to Government Proceedings R. 212, dated 30th July 1894.

Columns 6 *and* 11.—The population according to the most recent decennial census will here be entered until further orders (See Proceedings No. 331-9, dated 6th April 1892) subject of course to such alteration as may be necessitated by alteration in the area of "fully assessed land" by the resumption of alienated villages, or other causes.

Column 7 to be Column 5 divided by Column 6.

Column 8 to be as in Column 5, but Miscellaneous Land Revenue and Land Revenue on alienated villages to be excluded.

Column 9 to be Column 8 divided by Column 4 (*a*).

Column 10 to be Column 8 divided by Column 4 (*b*).

Column 12 to be Column 8 divided by Column 11.

14. *Table* D.—The form prescribed by the Government of India is intended to show the principal varieties of tenure held direct from Government. For Mysore (where the prevailing tenure is raiyatwari and the accounts are kept villagewar) the first four Classes and Classes VII

and VIII will be left blank, all raiyatwari holdings will be included in Class V, the heading thereof being altered from "Peasant proprietors paying separately" to "Small holdings held separate and direct from Government (raiyatwari tenure)" and all inams (Jahgirs, whose inam and kayamgutta villages and minor inams in sirkar villages) will be entered in Class VI. Leaseholders of gold mines will be shown under class IX "Others."

1. (No. of estates) represents practically the number of separate pattas issued or khates recorded in the Land Revenue Register. Two or more estates belonging to the same proprietor, if they are separately recorded in the Revenue Ledgers and form the subjects of separate pattas, will be separately reckoned for this return.

2. (No. of villages) will show the total number of villages, (primary of course) populated and unpopulated, *i. e.*, the areas constituted as villages by the Survey and Settlement Department.

3. *Item* 4.—One proprietor may be reckoned twice or oftener as the owner of two or more estates separately recorded according to the number of pattas held by him.

Item 5½.—Between Items 5 and 6 of the Government of India form, an item numbered 5½ should be opened to show "gross assessment." This in the case of raiyatwari lands will be the survey assessment and water-tax, and in the case of alienated lands it will be the combined quit-rent and water-rate (if any) payable to Government: in both cases without deducting remissions and other deductions, if any.

15. *Table E.*—This table is intended to show the number of voluntary and compulsory transfers of ownerships of lands and the area so transferred. By "voluntary transfers" are meant transfers made by actual contract or gift. Transfers by inheritance are not to be taken into account, nor non-permanent transfers such as leases, mortgages, &c. Only permanent transfers (for instance by sale or gift) should be included when the parties concerned apply for and obtain transfer of "Revenue Registry." These voluntary transfers will be entered in Columns 8 to 13 and Columns 20 to 25 (Private contract or gift). On the other hand under heading "By order of Court" Columns 2 to 7 and Columns 14 to 19 are included—

(*a*) changes of registry under decrees of Civil and Revenue Courts whether the decrees were passed on disputes regarding title or by reason of debts incurred by the judgment-debtors, and

(*b*) all cases in which lands are sold for arrears of revenue due to Government and purchased by private parties. Cases in which lands sold for arrears of revenue due to Government or bought in by Government will be excluded from this table.

The particulars contained in Columns 2 to 25 should de entered for each taluk opposite to two details under Column 1 "Class of tenure," *viz.*, (*a*) Revenue paying and (*b*) wholly or partially revenue free.

The information contained in Table E will be entirely based upon that *furnished for each village* in Village Account Form No. 9 (Statement of Increase and Decrease) and its enclosure. In Column 48 of the said village account, "Private transfers" and "Transfers by decrees of Civil Courts" are mixed up. But for the purposes of this return and pending revision of the Village Account forms, these details should be obtained separately by special arrangement.

16. *Appendix I.*—This is intended to contain a brief notice of remarkable variations or discrepancies which require explanation between the figures of the year of report and those of the previous year. All differences in excess of ten per cent should (except in cases of ordinary fluctuations in cultivation) be explained. Where general causes sufficiently account for the differences, detailed explanations need not be given.

17. *Appendix II.*—Shows the effect of changes in taluk boundaries and calls for no remarks.

7 ,, Chikkanna Setty, Tiptur.

I. Read memo No. 2865, dated 28th September—4th October 1904, from the Revenue Commissioner in Mysore, regarding the shifting of the Mayasandra village in the Turuvekere Sub-Taluk, to a better site and requesting to report direct to Government as to whether the District Board is willing to grant the advance for acquiring the required lands and if an advance is required the amount and the period within which it can be recouped.

Resolved that Government be asked to grant an advance of Rs. 3,000 which will be adjusted within three years.

II. Read Secretary's docket No. 2900—L. F. 255-93, dated 4—5th October 1904, requesting to report how the Maddagiri travellers' bungalow has risen in importance to be converted into second class, and also to inform if the Board are willing to take up the Kibbanahalli bungalow irrespective of the question of raising the Maddagiri bungalow to the second class.

Resolution.—The proposal was made upon the comparative importance of the two bungalows. Maddagiri bungalow has not actually risen in importance and so the Board resolve to hold their proposal in abeyance until such time as the Maddagiri bungalow rises in importance.

III. Read Government Order No. (4001-8-4-4)—L. B., dated 16th November 1904, regarding the grant of an imprest to the Taluk Boards, &c., for carrying out District Fund works.

Resolved that a sum of Rs. 150 for each Taluk Board, Rs. 50 for each Union be sanctioned as imprest for carrying out works.

IV. Read Secretary's docket No. (2957-64)-70-2—Ed., requesting to state why the District Board should not continue to contribute towards the cost of education as the house tax in Unions is credited to District Funds.

Resolution.—As the Unions are too poor to afford it, the Board consider that a contribution to the Educational Department might starve some necessary sanitary improvements.

V. Read Secretary's docket No. 2624-127-2—L. B., dated 27th September 1904, requesting to place before the Board and obtain its approval for certain works sanctioned in July and August 1904, and stating that the Board is competent to sanction works costing Rs. 500 and under.

Resolution.—The estimates are approved.

VI. Read reports from the Amildars of Tumkur and Gubbi, requesting that an extra hand be sanctioned to the Taluk solely for doing the work of the Local Fund Branch as, with the present establishment, it is difficult to cope with the increased work.

Resolution.—The work is increasing and a hand is necessary to each of the Taluks on pay of Rs. 15.

VII. The following Proceedings of Government were read and recorded.

(1) Government Order No. (3281-93)-57-4—L. B. Dt. Fd., dated 19th October 1904, sanctioning the supplemental grants to the budget estimates for 1904-05 on account of the Huliyar Union.

(2) Government Order No. (3445-6)-162-2—L. B., dated 27th October 1904, sanctioning the list of incomplete works from District Funds for the year 1904-05.

(3) Government Proceedings No. 1868-76—L. F. 42-92, dated 2nd October 1904, observing it undesirable that the ordinary repairs to 3rd class travellers' bungalows should be carried on by one agency and special repairs by another, and directing that the present practice be continued by which all the repairs to such bungalows are done by the Public Works Department.

(4) Government Proceedings No. (3355-65)-16-11, dated 22nd October 1904, directing that the question of metalling tank bunds on which District Fund roads run be left in the hands of the District Boards who seem to be alive to the importance of the subject.

VIII. Read Government Order No. (4188)-3-4—L. B, dated 19th November 1904, sanctioning the appointment of the Treasury Assistant Commissioner as a member of the District Board and calling for proposals to fill up the vacancy caused by the resignation of Mr. Hanumantha Rao.

Resolved that Mr. Chennakesavapur Sreenivasa Rao of Pavagada Taluk be recommended for appointment.

IX. Read the revised District Fund budget estimates of this district for 1904-05.

Resolved that the revised budget be submitted to Government for sanction.

X. Read and approved the list of works as per accompanying statement.

1. Read letter No. 1947, dated the 6th August 1904, from the President of the Civil and Military Station Municipality, forwarding for refund 10 statements received from Saval Muniyappa showing the amount of tolls aggregating Rs. 245-2-0 said to have been paid by him on the Kankanhalli and Lal-Bagh Road City Toll-gates during the months from September 1903 to June 1904 on his carts licensed in the Civil and Military Station Municipality.

Proposed by Mr. Cameron and seconded by Mr. Bronson that the claim is not sustainable.

Resolution.—Carried *Nem-Con.*

2. Read Sub-Committee's report regarding the plan of the proposed distribution system of electric lighting in the Bangalore City.

Proposed by Mr. Venkataramayya and seconded by Mr. Bronson that the Board fully trust that their resolution dated 11th February 1904, making a provision for an efficient system of electric lighting being installed throughout the City will be faithfully carried out and the work may be confidently left in hands of the Electrical Department.

The Board, having been told that the two Extensions and outlying villages and suburbs have been left out in the present scheme of operations, are of opinion that this omission may be pointed out to the Government as not being in strict accordance with the terms of the original resolution.

The Board thank Messrs. Gibbs and Calvert for their presence to-day at the meeting and their assurance to meet the requirements of the City and wishes of the Commissioners in giving an efficient system of electric lighting.

Resolution.—Carried *Nem-Con.*

3. Read Sub-Committee's report regarding the levy of Municipal taxes on houses of Tigalars built in their gardens within the City Municipal limits.

Resolution.—Sub-Committee's report may be accepted.

4. Read the General and Revenue Secretary's docket No. (3117)-87-4—Muni., dated the 12th October 1904, forwarding a petition from Saval Muniyappa and other Waddars of Byrasandra, praying for the renewal of the concession once shown to them, *viz.*, levying a quarterly license fee of Rs. 2 per every cart brought by them into the City in lieu of the daily tolls, and calling for the Board's opinion as to why this should not be done from the next official year.

Resolution.—As the President has not compounded with the petitioners, following the practice in some important Municipalities as called for in their Resolution dated 25th January 1900, the Board regret their inability to extend the temporary concession shown at the time the said Resolution was passed.

5. Read letter dated 25th November 1904, from Mr. J. G. Tait, Professor of Language Central, College, tendering resignation of the Presidentship of the City Municipal School's Committee.

Resolution.—Board regret at the resignation of Mr. Tait and unanimously are of opinion that he be requested to reconsider the matter.

6. Read an account of advances made to Mr. T. Seetaramaiah, Pleader, since his engagement by the Municipality in 1898 and adjustments made by him from time to time, charging on an average from Rs. 5 to Rs. 4 for each adjournment, irrespective of the fact whether such adjournments were given by the Court at the request of the Municipality or the opposite party

Resolution.—Deferred.

NOTICE.

No. 1—10-9-1901.—The *Mysore Gazette* is published at Bangalore every Thursday. Application for the supply of the Gazette on *Public Service* should be addressed to the Secretary to the Government of Mysore, General and Revenue Department. Postage is not charged for places within the Mysore Province. All subscriptions and advertisement charges must be paid *in advance* to the Compiler of the *Mysore Gazette*.

No. 2—10-9-1901.—Much inconvenience is caused in this office by subscribers not giving their full and correct addresses, and writing illegibly on the money order coupons, which are unfit for record.

No. 3—10-9-1901.—It is notified that as all Taluk Treasuries are authorized to receive subscriptions for the Gazette, money orders sent to this office will not be received, except from outside the Province.

No. 4—10-9-1901.—Communications on post-cards or on paper less than half a sheet of foolscap will not receive attention.

No. 5—1-10-1901.—An efficient system of check and counter-check is maintained over the despatching of Gazette copies forwarded through Post. No responsibility will be accepted when copies miscarry, or are not delivered to addressees, and such losses will not be replaced by duplicate copies.

No. 6—1-10-1901.—Complaints regarding non-receipt of the Gazette should be forwarded to the undersigned within a week after the date on which it is due.

No. 7—15-10-1901.—Copy is sometimes sent to the Press late on Wednesday evenings for publication in the next day's Gazette. This involves considerable inconvenience to the Press and expense to Government. It is therefore notified that all matter intended for publication in Parts II, III and IV should reach this office not later than Tuesday evening; and that for Part I not later than the forenoon of Wednesday, for the following Thursday's issue of the Gazette.

No. 8—15-10-1901.—It is requested that Departments will refrain from sending to the Press any matter for publication as extremely urgent later than 12 noon on Tuesdays when such matter can without inconvenience be held over for the next week's Gazette.

No. 9—15-10-1901.—Spare copies of notifications, etc., are often asked for long after their publication, when the matter has been broken up, necessitating its resetting, causing inconvenience to the Press and waste of money. It is therefore requested that when spare copies are wanted, a note to that effect, stating the number of copies, be made at foot of such notification, etc.

No. 10—15-10-1901.—If no instructions, either at foot of notifications, or separately by docket, accompany any matter, it will be printed in the language in which it is written, and published only once.

Secy. to Govt. of H. H. the Maharaja of Mysore,
Gen. & Rev. Dept.

OFFICIAL MEMORANDUM.

The Revenue Commissioner in Mysore has the honor to invite the attention of Deputy Commissioners of Districts and others concerned to the subjoined Memorandum of instructions approved by Government for facilitating the gradual introduction of the new Shekdari Scheme in the several taluks and districts of the State.

T. ANANDA ROW,
Revenue Commissioner.

MEMO OF INSTRUCTIONS.

1. A Register shall be maintained in the Revenue Commissioner's office and in the office of the Deputy Commissioners of Districts, wherein shall be entered the names of all the candidates qualified for the appointment of Shekdars by passing the Shekdari Test prescribed in sub-para 7 of para 4 of Government Order No. Fl. 2163-73, dated the 13th February 1904. For inclusion in this Register, candidates shall be called for by a Notification in the Gazette to be issued by the Revenue Commissioner and their order in the Register shall be regulated by their University Examination and their position in the Local Shekdari Examination.

2. The Deputy Commissioners of Districts may appoint any person from these lists to any vacancy in their districts, preference as among themselves, being given to candidates according to their qualifications.

3. The new distribution of hoblis in each district shall come into force immediately, upon approval by Government. They shall be manned by existing men, preference being given in the following order:—

(I) Permanent men, *i. e.*, those who were Shekdars before the Government Order No. 4401-8—1398, dated 16th December 1899.

(II) Men fully qualified under the new Rules.

(III) Men appointed subsequent to the Government Order of 1899 and who were therefore liable to be displaced by fully qualified men, when available under the new Rules.

4. The men thus appointed as Shekdars shall be placed in three Schedules A, B and C. Schedule A to consist of those fully qualified under the new Rules. Schedule B to consist of the others. Schedule C to consist of supernumeraries, if any. Those in Schedules B and C shall draw only the old scale of pay and allowances, if any. Those in Schedule A shall be entitled to draw the salaries fixed in the new scale as laid down in sub-paras 8 and 9 of para 4 of the Government Order of the 13th February 1904.

5. The horse allowance of Rs. 10, however, shall be allowed to all the Shekdars on the active list (*i. e.* also those in Schedules B and C) upon taking charge of the hoblis as newly constituted. Every Shekdar drawing this horse allowance shall be bound to maintain and ride a serviceable pony with saddlery, as contemplated by Government Order.

6. In allotting hoblis to existing Shekdars under para 5 above, the Deputy Commissioners may include in Schedule C any who, in their opinion, are inefficient and incapable of fairly discharging the duties laid down in sub-para 11 of para 4 of the Government Order. These, like others entered in Schedule C, should be absorbed as Taluk Gumastas or otherwise as vacancies occur.

7. Promotions to the next higher grade may be granted by the Deputy Commissioners under the conditions laid down in sub-para 9 of para 4.

8. The number of Shekdars in each grade in each district shall not exceed the proportion fixed in sub-para 3 of para 4 of Government Order which works out as follows:—

District.	Total No. of Shekdars according to new rules.	No. in the 1st grade.	No. in the 2nd grade.	No. in the 3rd grade.
1. Bangalore	52	10	16	26
2. Kolar	55	11	17	27
3. Tumkur	50	10	15	25
4. Mysore	73	15	21	37
5. Hassan	40	8	12	20
6. Shimoga	40	8	12	20
7. Kadur	33	7	10	16
8. Chitaldrug	31	6	9	16
Total, Mysore State ...	374	75	112	187

The allocation of the various grades of Shekdars to each taluk shall be made by the Deputy Commissioner, in consultation with the Revenue Commissioner.

9. The promotion from one grade to another being regulated by qualifications and seniority of service, it follows that, as a rule, the more highly paid of the Shekdars should be placed in charge of the more important or more difficult of the hoblis. This point however will be more fully considered, after the scheme is brought into working order.

MEMORANDUM

ON

THE RHEA-FIBRE PLANT.

Boehmeria nivea.—Hook. and Arn.

Origin of botanical name.—The genus *Boehmeria* was created in honor of George Rudolph Boehmer, a German botanist. The specific name, *nivea*, (snowy) has reference to the underside of the leaf, which is white like snow.

Figure and description.—*Boehmeria nivea* is a soft-wooded shrub of the nettle family, *Urticaceæ*. But it differs from the proper nettle in having no stinging hairs. Root tuberous and fibrous. Shoots mostly simple and cane-like; herbaceous at first but soon becoming woody. When full grown they vary in height from four to eight feet, or even higher where the conditions of growth are exceptionally favorable. Leaves alternate, long-petioled, hairy, broadly cordate, acuminate, coarsely toothed, and snow-white on the underside. The unisexual flowers are some-what crowded in simple or branching panicles in the axils of the leaves. In every case the pistillate or female flowers occupy the upper position, the male or staminate flowers being found at the base of the panicle. The plant has not been known to produce fruit or seed in Mysore, where it is an exotic, hence these parts are not figured.

Explanation of Plate.

1 End of flowering shoot.
2 Pistillate or female flowers.
3 Staminate or male flowers.
4 Male flower magnified.
5 Female flower, unopened and magnified.

Habitat and distribution.—The Rhea plant is truly indigenous to the Malay Islands, China, and Japan. But like other useful plants it has been cultivated and domesticated to some extent in many other parts of the world, as in India, Brazil, Paraguay, Ceylon, Australia, and the warmer parts of Europe. It is, in short, a sub-tropical plant requiring a copious rainfall (otherwise irrigation) to bring its growth to perfection.

Propagation.—To secure seed, the plants cultivated in this country require very special treatment. But even then, the supply is usually scanty and precarious. It is fortunate, therefore, that the Rhea plant is so readily propagated by the division of its tubers, offsets, and stems. The best plan is to lift a matured plant bodily for the purpose of division. The tubers, which resemble small potatoes, can then be dibbled into the nursery separately, the larger ones possessing several "eyes," can also be cut into "sets" as in the esculent just referred to. Then by careful handling, a sturdy rootstock can be separated into many parts, each having a little root and stem. Finally, the cane or stem can be reduced into cuttings of 5-6 inches in length. The best cuttings are obtained from the matured wood, but treated under glass, in fine sand, the tender or herbaceous portions of the stem will also take root. By the above methods many thousands of plants can be raised from even a limited stock. But to insure success it should be done during the growing season. In this climate, old stools and freshly rooted slips are practically as hardy as nettles, so that once established the plant is propagated without risk or even much trouble. The Botanical Gardens possess several thousand plants from which young stock can be raised in quantity. Rhea has also been domesticated to some extent in the coffee districts, so that even in the absence of seed, we have ample material to propagate from.

Sites for natural growth.—In Mysore, the hill country included in the districts of Hassan, Kadur, and Shimoga, affords the position and climate best suited to the hardy growth of Rhea, and in the most favorable situations it is not improbable but the plant would run wild to some extent. What is really required in this new product is its possession in great quantity raised at a nominal cost. It should therefore be encouraged to spread in suitable localities. It might, for instance, replace *Lantana camara*, with which it is nearly equally hardy, but less aggressive and far more useful.

Sites for cultivation.—It follows that where the plant will thrive without help it will also e the most productive under liberal cultivation. Extensive areas of comparatively open forest nd having a good head-flow of water from some perennial stream would answer well, providg that the soil is fertile and open. Good drainage is a very essential condition of this culre, so that the sloping sides of hills and sholas might be preferable to lands situated on flats l in basins. The annual rainfall should not be less than 50 inches and would not hurt wth if it reached 100. Wet lands on the sides of rivers and canals bordering the Malnad, ld only be suitable if they are porous and easily drained. But in all probability the existwet crops are much more profitable than Rhea is ever likely to become under similar conns of cultivation.

Cultivation.—Virgin forest soil, and good loam with a liberal admixture of sand, are lly suitable for the vigorous growth of Rhea. But there must be no stagnation of water, e it is necessary that plots demarcated for planting should be thoroughly opened by the gh. This is best done at the close of the Monsoon when the surface herbage can be ghed in and left to rot during the dry season. At the bursting of the South-West Monsoon

another thorough ploughing will be needed to make the surface soil soft and workable. Rooted plants of Rhea can then be put out in the field at 3-4 feet apart. The crop will not be a full one during the first year, but in the 2nd, 3rd and 4th years it will be full. Under good cultivation the young plants throw out many suckers or offsets, and after 12-15 months of continual growth the intervening spaces will be nearly full of stems of various sizes. After the fourth year the growth becomes stunted and the fibre deteriorates in length, texture, and value. When this takes place the field has to be entirely broken up and a new one laid down. But should it be preferred to break up and resuscitate the original field, a large amount of manure would have to be applied in the first instance and at reasonable intervals subsequently. After the first planting, field operations consist of weeding, hoeing, and removing the matured stems.

With continual growth all the year round, supported by irrigation during the dry months, an average yield will be three cuttings, but under exceptional circumstances even four cuttings may be obtained.

Possible yield per acre.—The outturn of fibre per acre differs according to climate and situation. But the best average results under proper cultivation are not likely to exceed eight tons of ribbon (stripped bark) per annum. At any rate, a larger quantity than this should not be expected from Indian cultivation.

Present market value.—Bales of assorted ribbons are now purchased on contract by a home company at £10 per ton. But it is very doubtful if this price would be maintained in the open market. Any quotation of value at the present stage of the industry must therefore be more or less unreliable. But supposing the yield in India is only six tons per annum, and the market value £5 per ton, an acre of Rhea would still be worth £30 to the cultivator.
